DETAILED ACTION

Election/Restrictions

1. This application contains claims directed to the following patentably distinct species of the claimed invention:

(1) the specifics of the liquid crystal panel carrier comprising a box with interior lateral surfaces having a plurality of cannellures, where the two ends of each attaching element are inserted into the cannellures on two opposing lateral surfaces comprising a first embodiment corresponding to claims 1-11;

(2) the specifics of the liquid crystal panel carrier comprising a box with interior bottom surfaces having a plurality of cannellures, where the attaching element are inserted into the cannellures comprising a first embodiment corresponding to claims 12-18

2. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

3. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
